HARVARD GRADUATE SCHOOL of EDUCATION

13 Appian Way / Cambridge MA 02138

Attn: Department of Admissions,

I would like to thank you for your time and efforts regarding your consideration for admission of Mr. Greg Lemoine to your graduates' program. I have known Greg for many years and I have had the wonderful privilege of seeing him perform and rise to exceptional levels within his chosen field of education.

Greg has demonstrated a unique talent that showcases his ability to engage his students, motivate their desire to learn and to extrapolate complex ideas into comprehensive, clear and concise lines of thought that his students could not only grasp but could build upon.

Greg has taken his well-rounded life experiences, coalesced this with his ever-expanding desire for perpetual learning regardless of the topic or experience. He uses this to not only fuel his own growth but to motivate those around him, to challenge themselves in the pursuits of higher growth that they otherwise may not have chosen to do

Greg is not only a highly educated professional instructor but he is also a self-taught IT specialist that utilizes each skill set to assist school systems, class rooms, and students in the ongoing challenges of education. Greg's ability to know how, when and where to be a leader and when to allow others to learn to lead is obvious by the pursuant levels of success associated to his team participation and guidance. Greg is neither afraid to point out when he is not the top subject matter expert on a given topic, but he also allows for his skills to represent himself when he is the subject matter expert needed at the time or circumstance.

Based upon Greg's proven track record, his relentless pursuit of educational excellence and his personal desire to engage with all whom he is task to work with, I see Greg utilizing the skills and training he is looking to gain from this program in the best light possible for many, many years to come.

Regards,

David Haigler, - B.Sc. Fire Science Administration,
